Hi David,

Attached is the Shrestha 2018 article. They only report on the number of exposed cases so I don't think it will be possible to create the 2*2 table for the ESM calculations. Let me know if you think I am missing something.

Can you get into the link below and see the document? I will call about dream-enacting behavior.

David.

Subject: DDVP summary tables

Hi Aaron,

When you have a chance, would you mind briefly looking over the summary tables at the end of the DDVP memo on SP? I'd greatly appreciate it. I'm not trying to make them look perfect and think they're in good shape as is, but anything you see that looks wacky to you, I think four eyes are better than two 😊 One thing specifically, the cancer and non-cancer tables are not the same size, can you help me resize them to be the same size?

Here's the SP link:

Thanks for your help!

-Ashlee
